R&D: The Heart of Our Success

At SRC Pvt. Ltd., our R&D is the driving force behind our three decades of innovation in the chemical industry. Specializing in Leather Chemicals, Adhesives, Automobile Care, Home & Personal Care, Printing Inks, Paper & Packaging, and Textile Chemicals, we are committed to pushing the boundaries of technology and sustainability. Our state-of-the-art in-house application labs, combined with our relentless pursuit of excellence, enable us to deliver cutting-edge solutions that meet the evolving needs of our diverse clientele.

Optimum adhesive solutions for Paper and Corrugated Board industry

In the dynamic realm of the paper and corrugated board industry, speed and adaptability are paramount. Few industries demand the same level of agility and responsiveness. The manufacturing and packaging processes must mirror the swift and ever-evolving nature of the industry, where innovation is key. In this rapidly evolving sector, having specialized partners is imperative to ensure the delivery of superior products.

These partners play a crucial role in crafting packaging solutions that not only meet the industry's rigorous standards but also set each product apart in a highly competitive landscape. Embracing innovation and collaboration is not just a choice; it's a necessity in an industry that thrives on precision, efficiency, and distinctive packaging.

The many different challenges can be tackled only in cooperation with competent partners with the necessary expertise and understanding of the industry. SRC supports processors with innovative, tried and proven adhesive solutions and a comprehensive advisory service – with the permanent objective of facilitating perfect packaging solutions and efficient processes.

Resonyl CT 2040:

A white thick paste copolymer, engineered for machine, nozzle, and manual applications in carton sealing, ensuring a robust and durable bond.

Resonyl CT 2040 M:

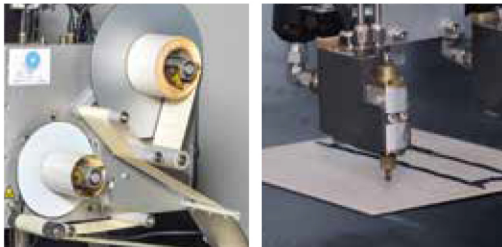

Tailored for wheel application in carton manufacturing, this white thick paste copolymer offers precision and efficiency in sealing.

Resonyl CT 2045:

A white thick paste adhesive, optimized for wheel application, delivering high-performance bonding in corrugated carton production.

Resonyl CT 2020:

A white flowing paste copolymer, designed for nozzle application in carton sealing, offering precision and seamless application.

Resonyl CT 2055:

A white flowing paste adhesive for nozzle applications, providing smooth and consistent bonding in carton manufacturing.

Resonyl CT 1002:

An eco-friendly adhesive for paper bag production, ensuring strong bonds in handles, seams, and bases for durable packaging.

Resonyl CT 2035:

A white flowing paste copolymer, ideal for nozzle applications, ensuring secure bonding in box board and corrugated cartons.

Resonyl CT 2300:

A white thick paste adhesive, perfect for manual pasting in corrugated sheets, setting the standard for quality and efficiency.

Resonyl CT 2010:

A white thick paste adhesive, excels in machine precision for window patching in paper and cardboard applications.

Resonyl CT 2070:

A white flowing thick liquid adhesive for wheel applications, enhancing reliability and efficiency in carton bonding.

Resonyl CT 2025:

A versatile white flowing thick liquid copolymer for both wheel and nozzle applications in carton production.

Packaging Options: Tailored to Your Needs

Discover flexibility in packaging with our adhesive solutions, available in a variety of sizes to meet your specific requirements.

Choose from the convenience of **30kg** jerry cans or pails for manageable portions, or opt for the efficiency of **50kg, 100kg, and 120kg** HDPE drums for larger-scale applications.

Flexible Packaging Adhesive

Introducing SRC's upcoming Flexible Packaging Adhesive. Superior strength and reliability in every seal. Trust SRC for your packaging needs.

a) Water Based Flexible Packaging:

Expect eco-friendly solutions with strong seals for your packaging needs.

Suitable for laminating a variety of substrates including treated polyolefins and treated polyesters.

b) Solvent Based & Solvent Less Flexible Packaging:

Superior strength for heavy-duty packaging applications. PET and Foil sealing materials like polyethylene and polypropylene.

Suitable for laminating and coating applications, especially To bond multiple films PE, BOPP, PET, Aluminum coated as well as aluminum foil.

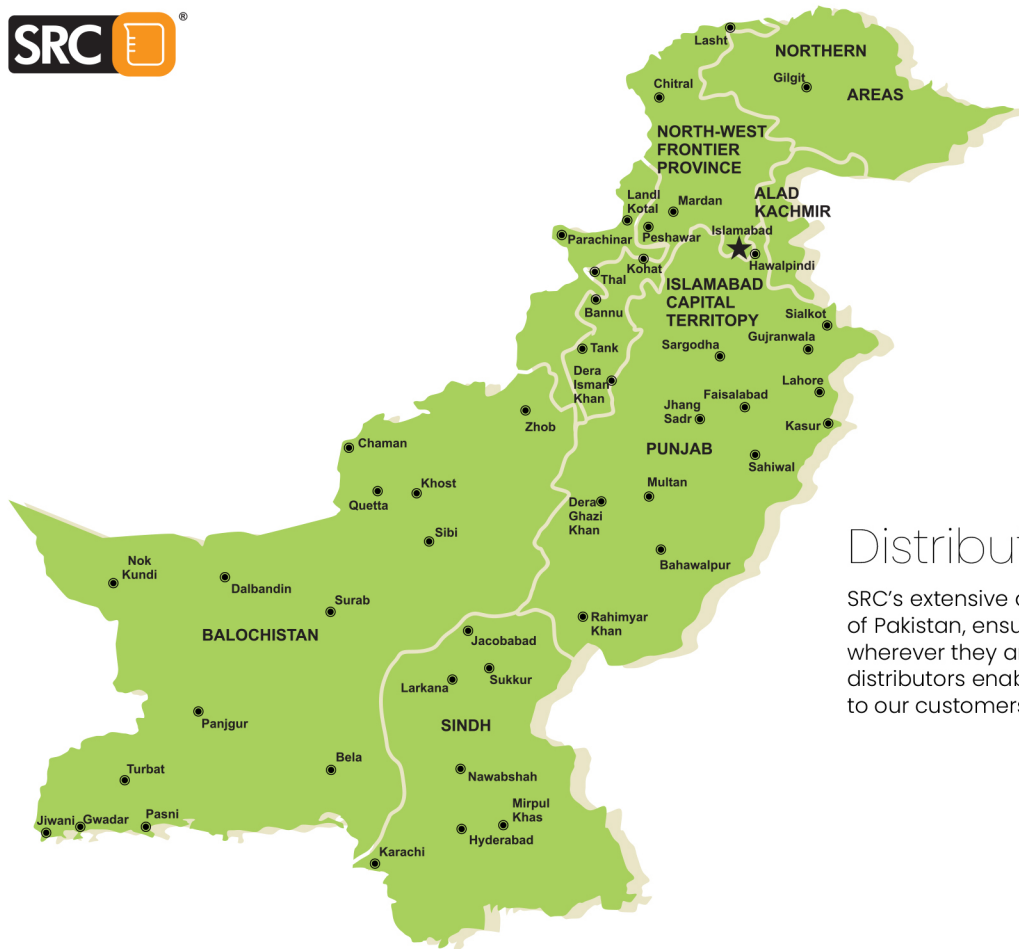

Water-based Flexographic Printing inks For Corrugated Cartons

These inks have bright and vibrant colors with smooth running without coagulation on rubber rollers.

Resins for Ink Industry

These resins are used to providing essential properties like adhesion, gloss, and durability.

- Acrylic dispersions or binders for water base flexographic printing inks.
- Acrylic resin solution as grinding resin used in water based flexographic inks.

Distributor Network

SRC's extensive distributor network covers all four provinces of Pakistan, ensuring that our products are readily available wherever they are needed. Our strong relationships with our distributors enable us to provide timely support and service to our customers across the country.

Crafting Excellence in Specialty Chemicals for Three Decades

With a legacy spanning over three decades, SRC stands at the forefront of the industry, dedicated to provide innovative and technology-based solutions, all while upholding a steadfast commitment to integrity and consistency. Our leading portfolio of specialty chemicals caters to a diverse spectrum of industries, including Leather, Shoe, Textile, Adhesives, Paper and Packaging, Wood and Fruit Preservation. Boasting an extensive range of over 350 products, SRC is synonymous with excellence in delivering cutting-edge solutions.

The inception of SRC was driven by a singular mission – to spearhead innovation and import substitution in the specialty chemical sector. Within our diverse operations, we proudly feature B2C brands such as Saaf n Safe, a homecare consumer brand, and Sidex, a car care consumer brand. As SRC continues to evolve, our unwavering focus on innovation and customer satisfaction remains at the core of our identity.
